Recycle to Educate ! Save Paper !!

**Drop paper waste only
into the "Recycle" bags**

All of us use paper for one purpose or the other. Especially at work places, tremendous amounts of paper are circulating day after day. Letters are sent and received, all kind of daily goods have to be unpacked, documents to be printed out, files are stored and so forth. Sooner or later all of it ends up in a dustbin. But what happens to the waste paper afterwards?

Usually, once disposed of, it is burnt or brought to a landfill where it takes years to decompose. And the next letter landing on your desk is made out of freshly cut trees again. Certainly, you don't have an influence on the paper products somebody else is using. However, you can decide how to handle the paper issue in your own company or home. Besides choosing ecofriendly paperproducts, you can make a difference by seperating your waste paper from other waste. If this is done, it can be recycled and used again!

In cooperation with AJS' Recycling Plant, Pratham Mysore has build up the infrastructure to collect waste paper for this purpose. If you decide to donate paper, you don't only contribute to a better environment, you also help to finance the programs of Pratham that reach out to the youngest of our society. We focus on children who are disadvantaged due to their parents' income and work to give them the oppurtunity to learn and grow up as others of their age also do.

Besides donating waste paper as a company, you as an individual can also:

- Spread the message that Pratham has started the 'Recycle to Educate' initiative among your friends and relatives,
- talk to the management of your company about it or
- join together with your neighbours to collect waste paper and accumulate the minimum amount of 25 kg/month that is necessary to make a collection worthwhile [▶▶ Read more ...](#)
